## GENERAL INSTRUCTIONS

PRICES: All prices F.O.B. Factory. This price list supersedes all previous price lists. Prices subject to change without notice. If quotation is rendered to any buyer located in a state where the seller is required to pay a sales, use or occupational tax, then said tax will be added to the price quoted and rendered as a part of the invoiced price.

SHIPMENTS: All products are shipped Set Up unless marked Knocked Down (KD) in Standard Packaging column in price list.

We reserve the right to ship material incorporating latest changes in design and, due to scarcity of certain items, to substitute hardware and fittings of equal quality, and methods of packing including material for same.

RETURNED SHIPMENTS: Unless authorized in writing by the Company, material cannot be returned for credit.

DAMAGE IN TRANSIT: Lyon products are carefully and securely packed for shipment and if carriers handle with ordinary care these products will reach destination in first class condition. The receipt of our goods by the Transportation Company ends our responsibility. Our customers should inspect shipments and protect their interests by refusing to accept damaged shipments until they secure damage notation on freight bill. All claims for delay, loss or damage must be made against the carrier.

CORRESPONDENCE: Address all communications to the Lyon salesman in your territory. He is in a position to give you prompt service. Do not send orders or letters to General Offices at Aurora.

**SHELVING INSTRUCTIONS:**

PRICES: The prices listed are for regular standard sizes that will meet practically every shelving requirement for which this product is designed. Any other sizes will be special and prices must be secured through your Lyon District Office.

ORDERING: In ordering complete Racks, order by Rack Number, number of First and Additional Sections, and Size. In ordering parts list all items showing (1) quantity, (2) descriptive name, and (3) listed size. The best method is to make a rough front elevation of complete racks and then count the number of uprights, shelves and accessories required.

**LOCKER INSTRUCTIONS:**

PRICES: Each locker price shown is per locker door opening and applies to lockers with standard equipment — without lock — shipped Knocked Down.

NOTE: A locker door opening is a single locker opening which may be in a tier 1, 2, 3, 4, 5 or 6 door openings high and for 1, 2, 3, 4 or 5 units wide.

SECTIONIZING: In ordering specify number of locker openings per section and whether single row or double row.

LOCKS: Padlock attachment is furnished as standard unless built-in flat key lock is specified. Add $1.09 per locker if built-in flat key lock with two keys is required. If other type of lock—combination padlock, etc.—is required, write your Lyon District Office.

MASTER KEYS: When master keys are required specify quantity at 46c per key.

# LYON METAL PRODUCTS, INCORPORATED

GENERAL OFFICES AURORA, ILLINOIS

February 1, 1947

FEB 17 1947

TO ALL LYON DEALERS

Subject: Revised Shop Equipment and Ironing Table Prices

We are attaching new price list dated February 1, which cancels and supersedes all previous price lists. Your discount remains the same, in accordance with Discount Sheet 333-E.

Even though the effective date reads "Effective Immediately," these prices will not apply to shipments until February 20 and thereafter. This is in line with the company's desire to give Lyon dealers advance notice, prior to shipment, whenever conditions permit.

The average increase of this price revision is not severe -- we are pleased to advise that, based on what we are currently manufacturing and shipping, it is only a 9.1% average increase.

We have delayed this price change as long as possible, but since our last price change, drastic increases in practically all major phases of our costs -- the biggest non-controllable items being our raw material purchases -- are now too sizable for us to further absorb. Typical illustrations of these increases, on an average basis, (many of which have been in effect since November) are --

- Steel -- 7% (3% to 15%)
- Hardware, fittings, etc. -- 20%
- Packing materials -- 25%
- Finishing materials (paint, etc.) -- 40%

Consistent with our policy of holding off price changes as long as possible, we have also kept revisions at a minimum, in line with good business judgment. Unless unforeseen further increases occur, it is our sincere opinion that there should be no additional price increases for many months to come. The latest information from our major raw material suppliers indicates a trend now toward a stabilizing of prices.

You will find that these new prices will keep you generally competitive, in line with national competition of like quality. Based on our latest investigation, there are any number of products in Lyon's extensive line which are still decidedly below competitive levels.

As a matter of fact, when you compare our average increase on the products we are currently shipping -- the prices we are giving you with this letter, on an over-all average, are only 24.8% higher than our prices of late 1940 and early 1941. Compare this percentage of increase, over this same period, with your purchases of other standard products where the increases appear to be in a range from 40% to 100%. From this you can readily see that our price policy has been sound, and certainly reasonable.

The outlook for 1947 is for a definite improvement over 1946 shipments -- to what degree, we cannot predict now. It still seems apparent that sheet steel will continue critical during the entire year, but we are bending every effort to secure all raw material available, and we will ship every pound possible.
